

Tektronix Extends Performance of TBS2000 Product Series with New TBS2000B Series of Digital Storage Oscilloscopes

Developed for both engineers and educators, with easy-to-use controls, automated measurements and built-in instruction features

BEAVERTON, Ore., April 28, 2020 /PRNewswire/ -- [Tektronix, Inc.](#) today announced the new [TBS2000B Series of Digital Storage Oscilloscopes](#) that was developed to meet the performance, usability and affordability needs of both engineers and educators. The TBS2000B scopes extend the performance of the [TBS2000 portfolio](#) to 200 Mhz with 2GS/s maximum sample rate. The TBS2000B introduction comes shortly after the release of Tektronix's Series 3 and 4 Series Oscilloscopes, as the organization remains committed to investing in a broad portfolio of benchtop solutions.

New Features and Options Ease Development and Troubleshooting

The TBS2000B Series is designed for easy operation and fast hands-on learning with a range of key features:

- Large 9-inch WVGA display and 15 horizontal divisions—the most in its class—provide 50% more signal visibility.
- 5M point record length, 200 MHz bandwidth, and 2GS/s sample rate capture and display significantly more signal to debug and validate designs faster.
- New lower-noise front end design offers better signal integrity and more accurate measurements.
- TekVPI™ probe interface supports a wide range of active, differential and current probes with automatic scaling and units.
- On-waveform cursor readouts with search and mark features enable easy identification of events that occur in the acquired waveform.
- Bandwidth is field-upgradeable from 70MHz to 100MHz to 200MHz.
- Includes Wi-Fi support (via USB Wi-Fi dongle), 2 USB host ports, and 100-BaseT Ethernet for easy collaboration.

Providing 100 percent compatibility with existing designs, the TBS2000B series is a drop-in replacement for TBS2000 series oscilloscopes, with the same form factor and programmable interface.

Hands-on Learning with Built-in Instruction Features

The TBS2000B is ideal for university and training environments, with built-in features that make instruction in engineering fundamentals easier for both students and teachers:

- HelpEverywhere offers instant tips within key menus, including measurement information, application tips and general guidance in the form of text and graphics.
- TekSmart Lab™ network software helps instructors set up and monitor many instruments from one PC.
- Courseware ecosystem lets instructors load information into the TBS2000B to help students during labs.
- Autoset, cursors and automated measurements can be disabled to facilitate teaching basic concepts.

Availability

Available now worldwide, the suite of TBS2000B modules are priced from \$1,370.00 US MSRP. Each unit receives Tektronix's five-year warranty, including accidental damage. For more information go to
