

Tektronix Expands Global Service Capability

Increased European and Asian Presence Gives International Companies Easier Access to Critical Calibration Services

BEAVERTON, Ore., October 25, 2011—Tektronix Inc., the world's leading provider of multi-vendor instrument calibration, repair and related services, today announced major investments in its calibration services across Europe and Asia – specifically, the United Kingdom, Netherlands, Germany, Japan, China and India. Already established as a global leader in calibration and test measurement services, Tektronix now has more than 100 points of service worldwide. This latest expansion creates easier access to Tektronix capabilities and offers high-quality service to all organizations in need of instrument calibration and test measurement services on a Global scale.

“It is important we remain close to our customers geographically, and these investments increase our ability to provide high quality multi-vendor calibration services to customers throughout Europe and Asia, and to complement our strong OEM offerings,” said David Carew-Jones, Vice President of Marketing for the Service Solutions Organization at Tektronix.

European Expansion

In the Netherlands, Tektronix increased high-frequency instrument and spectrum analyzer capabilities to 26.5GHz in Eindhoven. The launch of the new RvA-accredited Tektronix depot in Nijmegen, Netherlands, adds the capability for high-frequency calibrations up to 50GHz.

The company's Norwich, UK, facility received full UKAS Fluke 5790A AC measuring standard accreditation for calibration of all Fluke high-precision products.

In Germany, capabilities have been increased with the acquisition of the Keithley lab in Munich with ISO17025:2005 (A2LA) accreditation to perform AC/DC calibration and frequency measurement calibration. The Fluke laboratory in Cologne, Germany has now been accredited for several high-level capabilities, such as AC/DC voltage and current resistance and AC/DC transfer and high-frequency measurements.

Increased Capability in Asia

Tektronix added new calibration capabilities in Japan, China and India to increase the company's global reach.

By year-end, Tektronix will have high-frequency instrument and spectrum analyzer capability up to 26.5GHz in Tokyo and in early 2012 this capability will be extended to Beijing and Bangalore. Furthermore work has begun to open ISO 17025 accredited labs for general purpose electrical parameters, including AC voltage, DC voltage, current, resistance/ and high-frequency instruments up to 26.5GHz.
