

## **Tektronix Wins "Best in Test" 2010 Award**

### **MSO70000 Mixed Signal Oscilloscope Named Winner for Test & Measurement World Magazine's Award in Oscilloscope Category**

BEAVERTON, Ore., April 5, 2010 - Tektronix, Inc., the world's leading manufacturer of oscilloscopes, today announced that its MSO70000 mixed signal oscilloscope has been named the winner by the readers and editors of Test & Measurement World magazine for its Best in Test 2010 industry awards. The MSO70000 mixed signal oscilloscope beat out five other products in the oscilloscope category. The awards honor products that have brought significant technological advancement to the test industry. For the past 12 years straight Tektronix has been recognized by the "Best in Test" awards as an award winner or finalist, demonstrating strong acknowledgement to the innovation the company is delivering to the design engineering industry.

"The oscilloscope category was very competitive this year," said Rick Nelson, Test & Measurement World editor-in-chief. "The MSO70000, with its mixed-signal capability, offered the features and bandwidth that made it a favorite of our readers and editors."

The MSO70000 mixed signal oscilloscope includes 16 logic channels with a very accurate 80ps timing resolution and is the industry's only performance mixed signal oscilloscope. The MSO70000 also combines industry-leading bandwidth of 20 GHz with the industry's highest waveform capture rate, best signal fidelity, lowest noise floor and the only available hardware-based serial pattern trigger for data rates up to 5 Gb/s.

"It's an honor to receive this industry recognition and clearly demonstrates the relevance this performance-level mixed signal oscilloscope has on the electrical design community," said Brian Reich, General Manager, Performance Oscilloscopes, Tektronix. "This win is especially meaningful considering the other notable products we were up against."

#### About Test & Measurement World

The Best in Test Awards are presented annually by the editors of Test & Measurement World. These awards honor important and innovative new products and services in the electronics test and measurement industry. Products from all areas of electronics testing and inspection are eligible. Test & Measurement World has been presenting the Best in Test Awards since 1991.

#### About Tektronix

For more than sixty years, engineers have turned to Tektronix for test, measurement and monitoring solutions to solve design challenges, improve productivity and dramatically reduce time to market. Tektronix is a leading supplier of test instrumentation for engineers focused on electronic design, manufacturing, and advanced technology development. Headquartered in Beaverton, Oregon, Tektronix serves customers worldwide and offers award-winning service and support. Stay on the leading edge at [www.tektronix.com](http://www.tektronix.com).
